Depot. Trivandrum being an important reception centre, large stocks used to arrive in the Trivandrum Depot direct both by the sea route and by the rail route and allotments to Chirayinkil Taluk were then being made from Trivandrum Depot, where the stock was much larger than that in the Quilon Depot. Now that sufficient stock of foodgrains are available at Quilon Depot, the allotment to Chirayinkil Taluk has recently been made from Quilon. It may be stated that consistent with the availability of stocks, allotments to the different Taluks will be made from the most convenient of the depots.
